"Power Quality is Our Only Business"

The SineTamer® LA series of units blends outstanding high-energy "impulse" suppression with unsurpassed "ring-wave" transient protection utilizing our Frequency Attenuation Network®. This durable device is intended for general purpose and sensitive/critical load applications. Compact size and non-metallic enclosure design also allow it to be installed directly inside electrical panels and individual equipment disconnects. The internal installation provides the absolute shortest possible lead length and optimum performance. The LA-ST60 is extremely effective in limiting internally generated transients and is an absolute must on panels feeding office locations and/or microprocessor based equipment.

This economical device has features that are not available in devices costing many times its price. Its compact size makes installation a breeze. **Maintenance Free** operation and **20 Year Unlimited Free Replacement Warranty** provide peace of mind.

Standard unit is Type 2 10kA UL Nominal Discharge Current, Optional Type 2 20kA  $I_N$  is available.

GENERAL	
<b>Description:</b>	Parallel connected, transient voltage surge suppressor device utilizing both high-energy handling and Frequency Attenuation Network® circuitry for virtual elimination of ring wave type transients. Unit has a 20ka per mode/60ka per phase rating.
<b>Application:</b>	Designed for use at ANSI/IEEE Categories C, B and A with susceptibility up to medium exposure levels. Designed to protect sensitive/critical loads fed from distribution panels, branch panels and/or individual equipment panels.
<b>Warranty:</b>	<b>20 Years Unlimited Free Replacement</b>
<b>Product Qualifications:</b>	Listed to ANSI/UL 1449-2006 (3 <sup>rd</sup> Edition) by CSA (CSA MC#241804); UL1283* and CE Compliant (* Type 2 SPDs only) ISO 9001:2000, ANSI C62.72-2007

MECHANICAL	
<b>Enclosure:</b>	High strength ABS Plastic, NEMA 4 rated enclosure.
<b>Mounting:</b>	1" conduit fitting (internally threaded) and external mounting feet.
<b>Connection Method:</b>	#10 stranded wire.
<b>Shipping Weight:</b>	≈ 6lbs

ELECTRICAL	
<b>Circuit Design:</b>	Parallel connected, internally fused, hybrid design incorporating discrete all mode protection (10 modes for 3 phase wye units*) and utilizing our encapsulated design to provide improved durability. All suppression circuits are encapsulated in our exclusive compound to assure long component life and complete protection from the environment and/or vibration.
<b>Protection Modes:</b>	Dedicated protection components and circuitry for each mode. Discrete L-N, L-L (Normal Mode), and Discrete L-G, N-G (Common Mode). 10 modes / 3 phase wye system.
<b>Input Power Frequency:</b>	50- 60Hz typical
<b>EMI/RFI Noise Attenuation:</b>	30dB Max. from 1kHz to 10MHz
<b>Circuit Diagnostics:</b>	Super Bright LED, 1 per phase, normally on. Dry relay contacts for remote monitoring.
<b>Circuit Interrupt:</b>	External and internal (see installation instructions for details).
<b>Fusing:</b>	Component Level Thermal and Board Level Current Fusing
<b>kAIC Rating:</b>	200 kAIC when installed according to installation instructions
<b>Options:</b>	LA-STB = Type 2 20kA $I_N$ Type 1 available – contact factory for proper model number.

Because we are constantly seeking to improve our products, specifications are subject to change at any time.

**Let-Through Voltage Test Environment:** Positive Polarity. Time base=1ms. All voltages are peak (±10%). Surge voltages are measured from the insertion point of surge on the sine wave to the peak of the surge. All tests are Dynamic (voltage applied) except N-G which is static (no voltage applied). All tests were performed with 6 inches of lead length outside the device enclosure which simulates actual "as installed" performance.

Single-pulse, surge current testing for all modes at rated currents, is in compliance with NEMA LS 1-1992. Single-pulse, surge current capacities of 200,000 amps or less are determined by single-unit testing of all components within each mode. Present industry test equipment limitations require testing of individual components or sub-assemblies within a mode for single-pulse, surge current capacities over 200,000 amps.

Because we are constantly seeking to improve our products, specifications are subject to change at any time.
